1.4.2.2.2 Long Distance Network Access Transport

Contractor's Description of Service, include required service description, features and additional features offered by Contractor: Dedicated network transport services for accessing the AT&T Software Defined Network (SDN) for Long Distance calling are provided as follows:

- 1) DS1 - supporting up to 1.544 Mbps providing full duplex, four (4) wire, synchronous serial digital data transport. The DS1 services will be channelized (24 multiplexed DS0 channels each at 64Kbps) and will be B8ZS, which is the line coding that allows use of the entire bandwidth of a 1.544 facility, and Extended Super Frame (ESF), which uses a framing bit for non-intrusive signaling and control.
- 2) DS3 – supporting speeds up to 45 Mbps on a single circuit or channelized into 28 DS1 channels or 672 DS0 channels.
- 3) Primary Rate ISDN – supporting configurations of 'B' and 'D' channels over a DS1 transport facility

Geographic Availability: AT&T Dedicated network transport service is available throughout the United States, in all Incumbent Local Exchange Carrier (ILEC) territories open to competition as defined by the governing Public Utilities Commission where facilities are available either through AT&T-owned facilities or through resale of Incumbent Local Exchange Carrier facilities.

Service Limitations and Restrictions: Dedicated network transport services may only be used in conjunction with AT&T Services.

Change Charge Applicability: N/A (except as noted below in Feature Restrictions, Limitations and Additional Information)

1.4.2.3.5 Long Distance Domestic Calling

Contractor's Description of Service, include required service description, features and additional features offered by: Outbound long distance services provided through AT&T's SDN (Software Defined Network) OneNet platform. The SDN platform supports all inter-LATA, Intra-State, Inter-State, and International calling requirements. SDN is a custom network service that will provides a virtually private network with either dedicated (DS1, DS3, ISDN PRI) or switched (Dial 1) access.										
Geographic Availability: AT&T Dedicated network transport service is available throughout the United States, in all Incumbent Local Exchange Carrier (ILEC) territories open to competition as defined by the governing Public Utilities Commission where facilities are available either through AT&T-owned facilities or through resale of Incumbent Local Exchange Carrier facilities. For switched access requires a Primary Interexchange Carrier Code (PIC Code) be applied/supported by the Incumbent Local Exchange Carrier (ILEC).										
Service Limitations and Restrictions: None

14	Expanded Authorization Codes	SMOPC	Expanded authorization codes as described in Section 1.4.2.3.4.1.		\$0.00	\$0.00	Per 100 Codes	\$0.00	No	Required
15	Customized Message Announcements - Application	SMOAO	Customized Message Announcements can be based upon an intercept condition such as an invalid ID Code or customized by dialed number.		\$50.00	\$102.50	Application	\$0.00	No	Required
16	Customized Message Announcements - Application	SMOAO	Customized Message Announcements can be based upon an intercept condition such as an invalid ID Code or customized by dialed number.		\$0.00	\$0.07	Announce	\$0.00	No	Required
17	Flexible Routing	SMOFR	Flexible Routing feature enables SDN users to reroute calls to alternate locations when their network or business conditions deem this necessary. SDN Flexible Routing provides the option of either pre-planning alternate routes or creating alternate routes as needed.		\$100.00	\$307.50	Network	\$0.00	No	Required
18	Location Sharing	NRZC3	Location Sharing will enable CALNET users to receive calls from other CALNET SDN users on their SDN access lines.		\$100.00	\$0.00	Sharer	\$0.00	No	Required
19	Partitioned Database Management	SMOBP	Partitioned Database Management allows the customer to partition their SDN service locations into separate networks, while receiving the benefits of on-network calling capabilities between and/or among the SDN networks. AT&T establishes a separate database for each network.		\$1,000.00	\$102.50	Database	\$0.00	No	Required

20	Virtual Office Connection	SMO84	SDN Virtual Office Connection (NRA IV) allows customers to access their SDN networks from a predetermined location.		\$400.00	\$0.00	Call	\$0.00	No	Required
21	Enhanced Fraud Protection – NetProtect® Plus	NPPLUS	NetPROTECT® – Plus is available to all AT&T customers who have their own premises equipment (with dedicated LD access) and provides a maximum liability threshold of \$2000 prior to AT&T notification, PLUS provides extra protection for AT&T Business Long Distance customers and detects possible remote toll fraud five to seven times faster than normal Fraud Prevention activities. To accomplish this, the customer must provide AT&T with all their billable telephone numbers, as well as three contacts, one of which must be available 24 hours a day, seven days a week. AT&T notification, for PLUS, is defined as a telephone call, by AT&T Security, to one of the three designated contacts to provide notice of suspected toll fraud. PLUS customers detecting remote toll fraud, prior to AT&T, can reduce their liability by 50%. The customer must notify AT&T Security and, within 90 days of the fraud incident, send written notification of the means of fraud detection and any changes made to the equipment to stop the remote toll fraud		\$100.00	\$10.25	Telephone System	\$0.00	No	Required

22	Fully Enhanced Fraud Protection – Net PROTECT® Premium	NPPREM	NetPROTECT® – Premium provides \$0 liability prior to AT&T notification and for two hours after notification. Premium provides maximum protection for AT&T Business Long Distance customers and is the fastest AT&T NetPROTECT service for detection and notification of possible remote toll fraud. The customer must provide AT&T with all the information required for Plus service. AT&T notification, for Premium, is defined as a telephone call, by AT&T Security, to one of the three designated contacts to provide notice of suspected toll fraud.		\$300.00	\$205.00	Telephone System	\$0.00	No	Required
	Switched Digital Services-Data Transmission (SDDN)	See Below	AT&T's Software Defined Data Network (SDDN) allows end-to-end digital transmission at speeds of 56 kbps or 64 kbps and is available in two modes: static and dynamic. In the Static Mode, access to the network is full time at 56 kbps. In the Dynamic Mode, CALNET II users may initiate 56 kbps calls on a call-by-call basis via the use of a feature code. Dynamic Mode requires a digital PBX. With the use of ISDN utilizing a PRI, CALNET II users will be able to transmit data at 64 kbps in either Static or Dynamic Mode.				See Below		No	
23	SDDN 1	SMOCC1	Calls which originate from and terminate at on-net locations using special access		\$0.00	\$0.0492	Minute	\$0.00	No	Required

27	Subnetwork Screen Groups	SMOSG	Allows the creation of subnetwork call screening groups	Screening Groups contain numbers that members of Caller Groups can or cannot call. There are two types of Screening Groups: 1. Allowed Screening Groups: Contain numbers that members of a Caller Group are allowed to call. Implicit in this statement is that all other numbers dialed would be blocked. An example of an allowed Screening Group is a list consisting of area codes on the East Coast. All other calls would be blocked. 2. Blocked Screening Groups: Contain numbers that members of a caller group are not allowed to call. Implicit in this statement is that all other calls would be allowed to route. An example of a blocked Screening Group is a list containing numbers for "Time", "Weather" and "Directory Assistance." Only those numbers would be blocked and all other calls would be routed. The customer can choose to establish Screening Groups as either Allowed or Blocked, whichever would contain the fewest number of entries	\$200.00	\$51.25	Screen Group	\$0.00	No	Required

28	Subnetwork Calling Groups	SMOCG	Allows the creation of subnetwork calling groups	<p>Caller Groups are used to group individual callers who are to be given similar calling capabilities. Screening Groups are used to identify the particular numbers which are allowed or blocked for each caller. Privilege assignments are established for each Caller Group to identify whether callers may dial on-net, off-net and international calls.</p> <p>There are two types of Caller Groups:</p> <ol style="list-style-type: none"> 1. Station Groups: Contain originating numbers. All on-net locations that will be originating SDN traffic must be associated with a Station Group. When a call originates from a location, the customer's database will determine which Station Group is associated with that originating number for purposes of screening. 2. Code Groups: Contain the authorization codes of individuals that will be treated similarly in screening. Authorization codes are user-entered codes that can serve two purposes: screening and bill back. 	\$400.00	\$51.25	Caller Group	\$0.00	No	Required

1.4.2.3.6.a Long Distance International Calling

Contractor's Description of Service, include required service description, features and additional features offered by Contractor: Outbound International long distance services provided through AT&T's SDN (Software Defined Network) OneNet platform. The SDN platform supports all International calling requirements to the following countries with rates based on access type (dedicated and switched) and time of day. SDN is a custom network service that will provides a virtually private network with either dedicated (DS1, DS3, ISDN PRI) or switched (Dial 1) access.										
Geographic Availability: AT&T Dedicated network transport service for International calling is available throughout the United States, in all Incumbent Local Exchange Carrier (ILEC) territories open to competition as defined by the governing Public Utilities Commission where facilities are available either through AT&T-owned facilities or through resale of Incumbent Local Exchange Carrier facilities. For switched access requires a Primary Interexchange Carrier Code (PIC Code) be applied/supported by the Incumbent Local Exchange Carrier (ILEC).										
Service Limitations and Restrictions: Mobile terminations are any U.S. originating outbound calls that terminate on a mobile service outside of the U.S. In some countries, this simply means a mobile telephone. In others, "mobile" may be defined as any service which provides "mobility" to a customer, such as "personal follow me numbers" in the UK. Outside of the United States, mobile is largely a "Caller Pays" environment. This requires the foreign carrier to look to the call originator (in the U.S.) for payment. Mobile Terminations are not related to the type of phone used to place the call. Rather it is how it terminates that determines the call type.										
Change Charge Applicability: N/A (except as noted below in Feature Restrictions, Limitations and Additional Information)

1.4.2.3.6.b Additional International Long Distance Countries Offered by the Contractor

Contractor's Description of Service, include required service description, features and additional features offered by Contractor: Outbound International long distance services provided through AT&T's SDN (Software Defined Network) OneNet platform. The SDN platform supports all International calling requirements to the following countries with rates based on access type (dedicated and switched) and time of day. SDN is a custom network service that will provides a virtually private network with either dedicated (DS1, DS3, ISDN PRI) or switched (Dial 1) access.										
Geographic Availability: AT&T Dedicated network transport service for International calling is available throughout the United States, in all Incumbent Local Exchange Carrier (ILEC) territories open to competition as defined by the governing Public Utilities Commission where facilities are available either through AT&T-owned facilities or through resale of Incumbent Local Exchange Carrier facilities. For switched access requires a Primary Interexchange Carrier Code (PIC Code) be applied/supported by the Incumbent Local Exchange Carrier (ILEC).										
Service Limitations and Restrictions: Mobile terminations are any U.S. originating outbound calls that terminate on a mobile service outside of the U.S. In some countries, this simply means a mobile telephone. In others, "mobile" may be defined as any service which provides "mobility" to a customer, such as "personal follow me numbers" in the UK. Outside of the United States, mobile is largely a "Caller Pays" environment. This requires the foreign carrier to look to the call originator (in the U.S.) for payment. Mobile Terminations are not related to the type of phone used to place the call. Rather it is how it terminates that determines the call type.										
Change Charge Applicability: N/A (except as noted below in Feature Restrictions, Limitations and Additional Information)

1.4.3.2 Extended Demarcation Wiring Services

Contractor's Description of Service, include required service description, features and additional features offered by Contractor: AT&T Extended Demarcation (Extended Demarc) wiring services support the services covered by Contract for all Customer occupied buildings where services under this Contract are being offered. Extended Demarc wiring includes wire/cable related activities required to extend the demarcation point to the Customer defined termination location or cross-connect point from the Contractor's MPOE. Extended Demarc wiring shall include the necessary wire/cable, connectors, jumpers, panel, and jack. Extended Demarc wiring shall also include associated trouble shooting, testing and labeling.

Geographic Availability: Extended Demarcation Wiring Services are available for all AT&T provided services within the domestic U.S.

Service Limitations and Restrictions: Demarc wiring is limited to the following:

- Installation of cabling for extending services from the MPOE location to the Customer's point of utilization
- Installation of cross connects or rearrangement of existing jumpers
- Identification and testing of existing cabling beyond the MPOE to the Customer's Equipment location

Change Charge Applicability: N/A
